	<p>Closed Loop Site Services will strategically place 100 recycling stations (200 x 240 litre sulo bins) around the site for public use. The waste stations are 1 x comingled recycling and 1 x general waste sulo bin placed side by side and clearly signed with stickers – <i>shown below</i>. In addition to this we will be using designated bin caps which are placed over the 240 litre bin. This is the same front of house system as used at the Royal Botanic Gardens Events in Sydney, which has been successful in minimizing the quantities wastes sent to landfill generated FOH.</p> <p>In back of house areas i.e. catering there will be allocated 240ltr bins for generated waste and 1100 litre bins for cardboard which will be clearly labelled. There will also be 240 litre bins for comingled recycling. The cleaning manager will liaise with catering and food stall holders and monitor wastes in these areas to ensure waste streams are not being contaminated.</p> <p>Collection of FOH, BOH, Waste Stations and nominated areas will continually be cleared and transported to dedicated holding skips. There will be sufficient volume in these skips to contain the waste generated for the duration of the event.</p> <p>Bulk waste skips will be transported by our contracted waste supplier and taken to the closest sorting facility and land fill site respectively. Post event we will detail litter pick the site to ensure no waste is left onsite. On completion of the event a detailed waste report will be provided stating the weights of each waste stream and % of total waste. Recommendations for improvements or changes will be made at this time for the following year's event.</p>
<p>Closed Loop Site Services will provide:</p>	<ul style="list-style-type: none"> • All site consumable stocks and specialised equipment • Clearly labelled 2 bin system • Dedicated Event Manager • Experienced, uniformed, professional staff • Public liability insurance to the value of \$10,000,000.00 • Post event reports with recommendations and commendations for the next event.

Waste Signage:

All waste receptacles – 240ltr sulo bins, 1100ltr bins and 2 x 23 metre open top skips will be signed with clearly identifiable stickers as shown below:

I trust the information contained within is adequate and sufficient to date. Should there be any further details required, please do not hesitate to contact me directly on (02) 9339 9870 or on my mobile 0434 216 590.

Kind regards,
