Hi Vince,

The swept path analysis for the 10.5m waste collection vehicle is noted. Roads and Maritime Services will be requesting that a condition is imposed restricting vehicular access to the site for vehicles longer than 10.5m – can you please let your client know of this requirement.

Hi Malgy,

Thank you for the quick chat. As discussed, the largest size vehicle to be accommodated on site is the waste collection vehicle being a 10.5m rigid truck. The proposed development is catered for small warehouses which would accommodate 8.8m MRVs (design vehicle, in accordance with AS 2890.2). As swept path analysis is provided for the largest vehicle (10.5m truck), swept path analysis for the 8.8m long MRV is considered unnecessary. Please advise.

Please contact me should you have any queries.

Regards,

Vince Doan
Executive Engineer

Hi Vince,

There are no objections to the proposed removal of the vehicular access on Erskine Park Road. The single vehicular access proposed on Lenore Drive will need to accommodate simultaneous entry/exit movements for the largest design vehicle.
