Road/Footway Opening Permit Conditions – 2013-14

(To be read in conjunction with Application for Road Reserve Opening Permit)

Road/Footway opening permits

Permits must be obtained and restoration charges paid **prior** to any opening being made in any road or footpath surface. Failure to do this may incur additional charges or a penalty. Permit fees cover supervision costs and are **NOT** refundable.

A permit will be required for each opening in the road reserve - whether for water, sewer, stormwater, electricity connection, disconnection, repair, etc. The Permit Fee covers up to 2 inspections. Any additional inspections required after this, will be charged at \$129 each.

All openings in Town Centres and Shopping Centres will require special approval and at least seven (7) days notification. All work in these centres may be subject to special conditions by Council and restoration will be quoted by Council for each location.

Additional permit fees

Will be applicable if:

1. the road pavement is to be opened. Approval of Council's City Works Manager (or delegated authority) must be obtained **PRIOR TO COMMENCEMENT OF WORK** if the road pavement is to be opened.
2. Connection to Council's stormwater pipes, culverts, channels, pits or watercourses. Inspection of the completed connection **PRIOR** to backfilling will be required by contacting Council's City Works Department on 02 4732 7777.

Additional charges

Where an opening is made without a permit first being obtained, an additional fee of over and above the fee applicable shall be charged. Where due to an emergency, this charge shall be waived if the prescribed fee is paid within two (2) working days.

Where an opening is made without a permit first being obtained and the opening is restored without a Council inspection, an additional fee equal to the restoration charges applicable to the job will be charged.

Council reserves the right to restore the surface courses of openings made by any party in any Council property. Any additional restoration work considered necessary will be carried out and charged at the actual cost.

Renewal

The permit is valid for 12 months from date of issue. If the opening is not made in that time a new permit will be necessary. The cost of the new permit and any additional restoration or other charges will be based on fees and charges in force at the time.

Restoration works

Council's restoration charges are to restore the surface courses only. Any work other than this will be carried out and charged at the actual cost. To be satisfactory, all compaction and back-filling shall be carried out under Council supervision to ensure:

- all asphalt, bitumen and concrete surfaces must be saw-cut before excavation
- concrete surfaces must be restored to provide no additional joints in the finished surface except by prior negotiation and
- asphalt/Bitumen surface must be saw-cut 300mm outside of the trench area just prior to restoration.

Although Council reserves the right to restore openings made in Council property, special permission may be granted to pre-qualified private parties/contractors to do the work.

Restoration *Bonds* may be refunded upon satisfactory completion of the restoration to Council's specifications and a maintenance period of 12 months from practical completion has expired. Restoration Bonds must be claimed within 2 years of lodgement of this applications.

For any project involving large areas of restoration, the Public Service Authority or Contractor may negotiate with Council's City Works Manager on restoration charges.
