To Whom It May Concern,

Please find attached copies of our Certificate of Currency, (an updated version to be sent closer to bump in date), Environmental Impact Statement, Risk Management Plan, proposed show dates and times. Also, please find below our criteria for waste management. OUR DATES FOR ST MARYS, are bump in 23/09/2019 bump out 13/10/2019. SHOWING DAYS ARE FROM THE 26/09/2019 UNTIL THE 13/10/2019.

Webers Circus hires a 3 cubic metre skip bin from a local company in the area, for all public and domestic waste. Also a 3 metre recycle bin if required. All rubbish is collected on a daily basis, and disposed of into the skip, it is emptied when required. There are also 3, 240L general waste rubbish bins, and 1, 240 litre recycle bin, that are placed in and around the big top.

If there are no toilets already on the site, we hire 4 portaloos and 1 disabled portaloos from a local company and they are cleaned daily by an employee of the Circus, then emptied when near to capacity by the company we hired them from.

Grey water buckets are placed under each caravan outlet, and emptied into our large grey water bin, which is pumped out by a waste company.

Animal waste is collected twice a day, and placed in bags then into a lidded bin. It is generally taken to or collected by a local landscaping company, or disposed of via a waste company. Our Noise levels are controlled to local standards.
If you need anything else, please do not hesitate to call or email us.

Please note that all certificates that are forwarded to Councils/Showgrounds/Private Land owner ETC, are all current at time of submitting.

Regards,

Julie Cocker,

Office Manager,

Webers Circus.
