Property Details

Lot 1 DP 851152 Cnr The Kingsway & Charles Hackett Dr

Proposal

To conduct Stardust Circus performances at Lot 1 DP 851152 Cnr The Kingsway & Charles Hackett Dr
From 13th Sept To 5th Oct 2021

The performance includes Human and Animal performers in a 1 hour 45 minute production suitable to all ages and we have Department of Agriculture Permits for all animals in the show.

1. Access & Traffic
The site has an established access through a side road, the site is adjacent to parking areas of the Liverpool Catholic Club
2. Public Domain
The site is a recognised venue for outdoor entertainment
3. Heritage
Nothing in the area will be damaged, removed or changed.
4. Water
Water will be accessed and used sparingly.
5. Soils
The ground is of a firm base
and we will not be disturbing or removing any of the soils from the site
6. Air & Microclimate
We do not have any air polluting equipment with the circus other than motor vehicles which are stationary for the duration we are on site
7. Flora and Fauna
Any Flora that may be in the adjacent area will not be disturbed. Unlikely local fauna will be in our area
8. Waste
All waste generated, including domestic rubbish and animal waste will be collected daily and placed in bins for removal by local Waste Removal Contractors
9. Energy
The circus will use Electricity from switch boxes on site and run our own generators for backup power during the performances
10. Noise & Vibrations
Very little noise or vibration will be made as the sound system is only used inside the Big Top.
11. Natural Hazards
In the immediate area there is unlikely to be any natural hazards causing any problems. In the event of severe inclement weather we shall cancel any performance likely to be affected.
12. Technological Hazards
We do not envisage any technological hazards in the operation of the circus performances.
13. Safety, Security & Crime Prevention
We have an Emergency Evacuation Procedure in place and use our own personnel for of security of the site night and day.
14. Site & Internal Design
The site has been used for many purposes including circuses and carnivals
15. Social & Economic Impacts
The circus is still popular with the public and it is designed as a family entertainment.

16. Construction

The Circus Tent and associated equipment has Structural Engineer Design Approval and the equipment is put up and pulled down by experienced persons

17. Cumulative Impacts

For the period of time on site there will be no adverse effect to the Environment or the local infrastructure from the circus having been there.

18. Site Suitability

This is the recognised site to have circuses and has the amenities to compliment our type of operation

Tent and seating capacity, exits and emergency lighting

The seating capacity is for 680 persons.

Toilets will be in a close proximity to the Big Top.

Illuminated exit signs are located at each exit and they are of the approved type and are connected to town power supply and are kept charged for the duration.

Fire Extinguishers as per requirements will be in place, 9 litre water extinguishers adjacent to each Exit.

Also 4.5 kg Dry Chemical type at the generators and at electrical switchboards.

We have Emergency Light Units, also power back up by means of a second power supply from our generators

The circus is usually well received in the St Marys area and is a family entertainment.
