

**RE: Lot 1 DP1071114 & LOT 55 DP1170183 Erskine Park NSW 2759**

To Whom It May Concern,

We write this statement on behalf of Grasshopper Environmental Services to confirm that we will be able to provide ongoing waste collection for the above address as per the proposed method of collection as per the drawings.

Standard waste truck dimensions are 8000 – 10500mm long and 2500mm wide and we confirm that the manoeuvrability through the site is achievable to collect the waste bins to all the units including the cafe. The site access designed is in an adequate format and is efficient for a large rigid vehicle to manoeuvre easily through the site in a one way in and one way out configuration from either road. The hours of collection will most likely be in the early morning hours on a weekday which is normally outside of business hours, so it will not have any impact on pedestrian activities and vehicle movement. The proposed waste bins are generally 1100 litre bins and waste will be stored appropriately inside of each unit as per the drawings. Each tenant will be responsible to wheel their waste bins out through their roller doors at the internal driveway and be responsible to wheel their bins back into their units after collection.

Should the reader of this statement require further information, we are more than happy to assist and can be contacted on 1300 147 277

Yours Faithfully,

Ian Stewart  
Director  
Grasshopper Environmental
