

ACCESS REPORT

“FERNHILL”

PICNIC RACES
DEVELOPMENT APPLICATION

18TH JUNE 2014

The purpose of this report is to provide an accessibility strategy that demonstrates how people with disabilities will achieve equitable and dignified access to enable inclusive participation to experience the proposed picnic race event at the Fernhill estate complex.

The Access Strategy encompasses five primary elements which have been applied to Picnic Race event based on the locality within the estate, temporary installations and Event Management support. The primary accessibility elements and functions include.

- (A) Accessible parking and accessible intrasite transport which enable accessible transfer to and within the Patron Enclosure.
- (B) Accessible viewing areas and amenities.
- (C) Accessible sanitary facilities.
- (D) Wayfinding signage that incorporates accessible facilities and pathways.
- (E) Access awareness training for event staffing.

- Disability Discrimination Act (DDA)
- Disability Access to Premises Standards (2010)
- Penrith Development Control Plan

EXECUTIVE SUMMARY

With respect to access for people with disabilities the following provides an overview of the proposed access strategy to enable equitable access and inclusive participation of people with disabilities within the proposed events.

The plans contained in this report (dwg DA 101 Issue A) confirm that the site topography of the racecourse can provide appropriate access for people with disabilities through the installation of;

- Accessible parking and set-down areas with accessible intrasite Courtesy Cart transfers to the Patrons Enclosure.
- The Patrons Enclosure shall provide accessible viewing platforms with a temporary matting accessway over reinforced turf to access the food and beverages, betting facilities and a wheelchair accessible toilet.
- Accessible sanitary facilities.
- Accessible wayfinding information.
- Waiters and other event management personnel will also be available to assist people with disabilities.

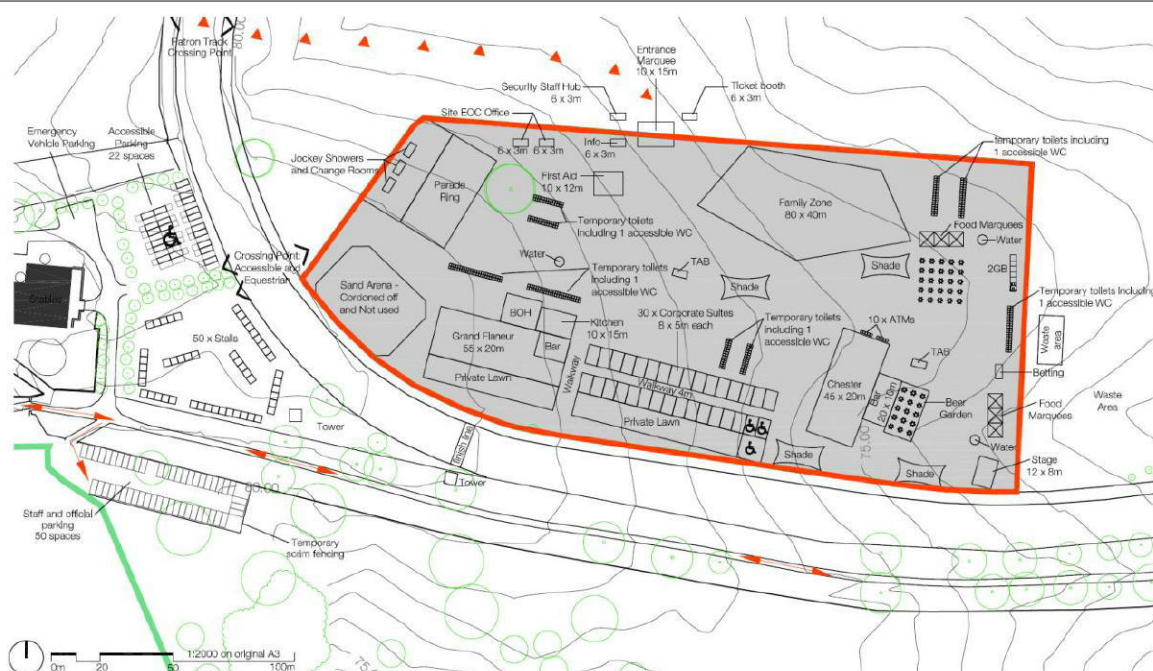

In summary it is my opinion that the abovementioned accessibility installations and management systems shall facilitate equitable, dignified and inclusive access for people with disabilities in a manner that will comply with the aforementioned accessibility standards and be consistent with the Disability Discrimination Act.

Mark Relf, Access Consultant (ACAA)

ACCESSIBILITY ASSESSMENT

RACECOURSE & PATRON ENCLOSURE

1. **Accessible Parking & Patron Courtesy Cart Transfers:** Accessible parking and drop-off point will be provided on the south-western side of the track with ample room for up to 22 spaces setout in a manner consistent with AS2890.6.
2. The event management proposes patron cart transfers into the spectator enclosure, that will include the capacity for a wheelchair accessible cart vehicle, similar to the image below.
3. The Patron Courtesy Carts shall provide assistance for people with mobility impairments from their car or taxi drop-off into the enclosure thereby enabling appropriate access and support to ensure equitable and dignified access.

4. **Enclosure Access & Mobility:** Within the Patrons Enclosure the event proposes the following accessibility features;
 - a. All Terrain Mobility Scooters for hire.
 - b. Raised platforms and Private Lawn Area that provides a reinforced firm lawn surface similar to a bowling green/croquet lawn that will be overlayed with matting for the race day event to facilitate wheelchair access to shaded viewing areas with a matting accessway to food and beverages, betting facilities and a wheelchair accessible toilet.
 - c. Unisex wheelchair accessible toilets in several locations.
 - d. Waiter personnel will also be available to assist people with disabilities.
5. The reinforced lawn area section will be located in the south-east corner of Patrons Enclosure directly adjacent to the race track.

GRASS-CEL STOPS and PREVENTS LAWN DAMAGE PROVIDING GRASSED VEHICLE AREAS

6. In my opinion the combination of reinforced turf with a appropriate matting overlayed for the race day can facilitate reasonable wheelchair accessible paths of travel and provide a suitable balance between the heritage significance of the curtilage and the objectives of the Disability Discrimination Act.

7. **Accessible Toilets** – While there are no permanent accessible toilets within the property the plans show 5 locations where temporary facilities can be installed with each location proposing the inclusion of an accessible toilet.
8. Appendix B provides examples of suppliers of sanitary facilities for temporary events that can also provide an accessible facility.
9. **Wayfinding Signage & Staff Training** – The event management shall ensure that people with disabilities shall be afforded with appropriate information and assistance to use the accessible facilities. The management systems shall incorporate;
- (a) **Booking Systems** that provide information about the range of accessible facilities and services such as; accessible parking location, accessible pathways to accessible viewing areas and amenities and website access that requests patrons to indicate requests for assistance.
 - (b) **Event signage** that incorporates directional signage and/or contact personnel to accessible facilities.
 - (c) **Staff Training** that incorporates disability awareness training.

APPENDIX A –TEMPORARY RAMPS

NEXUS™ SERIES III

Aluminium Modular ACCESS RAMPS

The Nexus Series is our premium range of modular access ramps. The collective components form an attractive design, which have minimal impact on the surroundings yet fulfill the primary objective of providing ease of access.

The system's features allow a multitude of uses - disabled access, shopping carts and prams, delivery trolleys, temporary construction and building site access, elevated walkways and use as a directional thoroughfare.

The optional perforated floorplate surface has been proven ideal for extreme weather conditions - heavy rain, frost and snow, cyclones or muddy tropical conditions. Unwanted substances drain away, whilst retaining a non-slip surface.

Checkerplate floor
R10.5
slip rated

Perforated floor
R12
slip rated

Epoxy floor
R14
slip rated

Features

- Modular construction, steel frame sections
- Tubular steel handrails
- Aluminium ramp surface with non-slip finish
- Adaptable and interchangeable design
- No site construction required
- Suitable for indoor and outdoor use
- Fully adjustable to almost any height
- Colour coordinated to your requirements
- Load rated up to 500 kg
- Easy to assemble and available in kit form
- Can be delivered Australia wide
- 10 year structural warranty
- All steelwork is galvanised and powder coated for durability

Heavy duty handrails

Balustrade matching handrails

Optional School handrails

MODULAR LANDINGS & DECKS

A landing compliments a quality ramp.

In order to provide the circulation space required by AS 1428, Australian Ramp Systems has created an ingenious and flexible landing system to work with our ramps.

Landings can be the solution where you need to join up multiple doorways or add another building which has to link up to others. Where initially it seems that multiple ramps may be needed, often we can build the decking in to accommodate just one ramp as a less costly alternative, for example in accommodation units and school blocks.

Our landings are fully engineered, and supplied prefabricated with box-section framework and adjustable-height support legs. Modwood is the recommended flooring surface.

With an average width of 10m, landings are available in various sizes up to 60m long. However all landings are custom made to suit your needs and we offer you complete on-site access in one easy installation contract.

Features

- Aluminium 80mm x 40mm box section, fully-welded sub-frame
- Available up to 60m long
- Adjustable height support legs
- Load rating 300kg/m2
- Modwood surface recommended
- TGSi installation service

PORTABLE RAMPS

Australian Ramp Systems offers a variety of ramps to eliminate small trip hazards. Our portable ramps are lightweight and easy to install.

MINI RAMP

Mini ramps for long or short term use. Durable and adaptable to suit all situations, domestic or commercial.

- Hinged for variable step heights
- 1000mm wide x 600, 900, 1200 or 1500mm long
- High visibility safety edges

Disabled and Easy Access Portable Toilet hire

Wheel Chair Access for Disabled and Special Needs events and functions

The Rent A Bathroom Special Needs portable toilet features internal layout which meets Australian standards and has a flat ground level entry floor with wide door for ease of wheelchair access.

This cabinet has been time tested around the world and is made of rugged polyethylene for years of durable use. The one piece seamless roof gives the unit added strength and stability.

Hand grips on each side and built in corner grips make moving easy. The fit out inside is designed for special needs occupants and complies to the Australian Standard for disable toilets including the heavy duty stainless steel support railing and it's positioning.

KEY FEATURES

- Wide Self Closing Door
- Flat Floor Design which means no ramps
- Meets Australian Standards
- Translucent Roof provides bright interior
- Interior designed for special needs
- Easily operated hand pump
- Large waste and fresh water capacity

CONSULTANCY PROFILE & STATEMENT OF EXPERTISE

Accessibility Solutions consultancy offers a range of services to provide advice for clients to develop new and modify existing buildings, facilities and services to be accessible to people with disabilities to comply with legislation and regulations relevant to people with disabilities.

Relevant legislation and regulations that underpins advice includes the Disability Discrimination Act (DDA) Building Code of Australia, Australian Standards 1428, HREOC Advisory Notes on Premises, DDA Transport Standard, State Environment Planning Policy No. 5 Housing for Older People or People With a Disability (SEPP 5) / Seniors Living Policy, SEPP 65 – Residential Flat Buildings Design Code and various local government DCP's.

The scope of services provided by Accessibility Solutions includes:

- Plan Appraisals and design advice
- Access Reports for development applications and construction certificates
- Expert Reports for Court evidence
- Access Auditing of existing buildings, facilities, transport conveyances and infrastructure
- Policy and document reviews and development of Disability Action Plans
- Staff training in access auditing

The services consider issues concerning people with all types of disability including; physical; vision; hearing, intellectual and other cognitive impairments that may affect access for people with a disability consistent with the Disability Discrimination Act.

As principle consultant Mark Relf has considerable experience and expertise in a wide range of access related projects and is a recognised Access Adviser approved by the NSW Ageing and Disability Department and has attained accreditation with the Association of Consultants in Access Australia for the purposes of providing advice concerning access to the built environment and services for people with disabilities.

His expertise has been gained over 20 years working in management and advocacy roles within the disability sector and since 1994 providing advice to clients on access issues. Mark also participates on various key committees concerning access for people with disabilities. His qualifications and affiliations are:

- Accredited Member of the Association of Consultants in Access Australia.
- Member, Standards Australia ME/64 Committee responsible for the AS1428 suite and AS4299 – Adaptable Housing.
- Member, NSW Heritage Office's – Fire, Access and Services Advisory Panel.
