**STATEMENT OF  
ENVIRONMENTAL  
EFFECTS**

**Development address:** Lot 2162 (DP 1168992)  
CABARITA WAY,  
ERSKINE PARK,  
PENRITH

**Clients:** Mr. Duffy & Ms Grieve

**Council:** Penrith Council

**Date:** 19<sup>th</sup> July 2013

**Masterton Homes**  
Cnr Sappho Rd & Hume Highway  
Warwick Farm  
**Job No. 2007214**

## **Site Suitability**

The site is situated on the southern side of Cabarita Way and is the subject of this application. The property is presently vacant.

The site is a rectangular in shape with a total area of 523.80sqm and a fall in relation to the topography of the land of approximately 1.450m to the front north eastern corner of the block.

The locality is characterised and developed by a mix of single and two storey dwellings. These homes are either of face brickwork finish or cement rendered finish which compliments the appearance and requirements of the modern era. The design of our proposal is not out of keeping with the existing streetscape and is well adapted to the surrounding developments.

## **Suitability of the Dwelling**

The proposal has been designed to contribute positively to the streetscape. It is consistent with the character of other developments in the street and is therefore felt to be compatible with the locality. The setback and window configuration ensures no detrimental effect on the adjoining sites and solar access is not compromised.

## **Design guidelines**

The proposal is for a single storey brick veneer dwelling with a tiled roof, consisting of formal and informal open plan entertaining areas, bedrooms, bathrooms and a double lock up garage. The dwelling has a total floor area of 259.56m<sup>2</sup> (including alfresco and garage areas). The dwelling has a front setback of 4.683m from the northern boundary and a rear setback of 7.500m from the southern boundary to the Alfresco area. The side setbacks are 0.203 from the western right hand side boundary of the proposed garage and 1.067m from the eastern boundary at the left hand side of the proposed dwelling.

The **SYMPHONY** design is very well adapted to the existing surroundings and character in the Orchard Hills area. The home has style and character with the introduction of articulated external walls and variations in roof geometry, therefore minimizing the bulk and scale of our development. Materials finish such as face brickwork, concrete tiles to the roof and a modern façade, adds architectural elements and vision for future construction and sets a desirable precedent for any future development in the surrounding areas.

The overall appearance of our proposal is comparable to other developments in the locality. The relationship between the dwelling and the streetscape is strengthened with a well designed proposal that incorporates a well articulated front façade that incorporates architectural design elements such as a portico to the front entry, a visible front entry door for security purposes and a garage that is setback from the main façade to avoid garage dominance to the streetscape.

## **Present and previous uses**

The site is presently vacant and will be developed with a single storey brick veneer dwelling that will be for private residential use, maintaining the sites current use.

## **Heritage**

There is no indication that this property is affected by heritage.

## **Bushfire Prone Land**

As per the section 149 certificate the property is NOT bushfire affected.

## **Compliance with Development Standards**

Pursuant to Section 79C(1) of the Environmental Planning & Assessment Amendment Act 1979 the following heads of consideration apply: -

### ***(a) Relevant Planning Instruments***

The property is zoned 2 (b) – Residential (Low Density). The construction of a dwelling is permissible in this zoning, with Council consent. Compliance with the councils DCP is summarised in the following table: -

<b>Issue</b>	<b>Council Requirement Min</b>	<b>Proposed</b>	<b>Comment</b>
<b>Front Setback (m)</b>	<i>5.50m</i>	<i>4.683m</i>	<i>Complies</i>
<b>Side Setback (m)</b>	<i>900mm</i>	<i>1.067m &amp; 0.203m</i>	<i>Complies</i>
<b>Cut &amp; Fill (maximum)</b>	<i>1000mm cut &amp; 1000mm fill.</i>	<i>525mm cut approx. 525mm fill.</i>	<i>Complies</i>
<b>Stormwater Disposal</b>	<i>To water tank. O/flow to street or easement</i>	<i>To water tank. O/flow to street</i>	<i>Complies</i>
<b>Ridge Height</b>	<i>10.000m to N.G.L.</i>	<i>5.900m</i>	<i>Complies</i>
<b>Private open space</b>	<i>80sqm</i>	<i>206.43sqm</i>	<i>Complies</i>

From the above summary, it is clear that the proposal complies with all of councils DCP.

## **Privacy, Views and Overshadowing**

The attached plans indicate that we are constructing a single storey dwelling which will have minimal overshadowing concerns onto the neighbouring properties. The setback and window configuration ensures no detrimental effect on the adjoining sites and solar access is not compromised.

Neighbouring properties will achieve the minimum requirement of 4hrs sunlight to their courtyards and living area windows.

## **Drainage**

The slab-on-ground will result in minimal disturbance to the natural slope of the land. Stormwater will travel to the proposed water tank and overflow to the easement which satisfies councils requirements

## **Erosion & Sediment control**

Erosion and sediment measures will be put in place by Masterton Homes prior to the commencement of any works. These measures will be maintained throughout the construction of the dwelling. As indicated on the site plan there will be a stockpile to contain rubbish and a trade waste bin. The building area will be surrounded with a geotextile fabric to prevent any sediment being washed onto the street and into the stormwater system.

## **Ecological Sustainable Development**

The proposal demonstrates cross flow ventilation throughout the dwelling.

Wall insulation to the value of R1.5, ceiling insulation to the value of R3.5 have been included in this design to keep the house warm in winter and cooler in summer.

It is proposed to install an above ground rainwater tank with a total capacity of 3000ltrs. Water from this tank will be used for flushing toilets, garden taps and the laundry washing machine. This satisfies the requirements of the New South Wales BASIX policy and all targets relating to Water, Thermal comfort and Energy will be achieved.

## **Openspace & landscaping**

As indicated on the Concept Landscape plan, the residents have quiet a large amount of open space to enjoy and landscape as desired upon completion of their new home.

## **Submissions**

It is expected surrounding neighbours will be notified in accordance with Council's Notification Policy. Should objections be received it is hoped Council will enable mediation to occur in order to resolve any issues.

## **Conclusion**

Councils DCP requirements and good planning principles have been incorporated in a design that best suits the site and surrounds, resulting in a high quality development that will enhance the locality.

Consideration has been given to matters listed in the LEP & DCP, concluding that the development warrants approval.

Yours Faithfully
