# **BASIX**<sup>°</sup>Certificate

Building Sustainability Index www.basix.nsw.gov.au

# Multi Dwelling

Certificate number: 866157M

This certificate confirms that the proposed development will meet the NSW government's requirements for sustainability, if it is built in accordance with the commitments set out below. Terms used in this certificate, or in the commitments, have the meaning given by the document entitled "BASIX Definitions" dated 29/06/2009 published by the Department. This document is available at www.basix.nsw.gov.au

Secretary Date of issue: Friday, 06 October 2017 To be valid, this certificate must be lodged within 3 months of the date of issue.

### Schedule of BASIX commitments

The commitments set out below regulate how the proposed development is to be carried out. It is a condition of any development consent granted, or complying development certificate issued, for the proposed development, that BASIX commitments be complied with.

### 1. Commitments for multi-dwelling houses

#### (a) Dwellings

| i) Water   | Show on<br>DA plans | Show on CC/CDC<br>plans & specs | Certifie<br>check |
|--|---------------------|---------------------------------|-------------------|
| (a) The applicant must comply with the commitments listed below in carrying out the development of a dwelling listed in a table below.   |                     |                                 |                   |
| (b) The applicant must plant indigenous or low water use species of vegetation throughout the area of land specified for the dwelling in the "Indigenous species" column of the table below, as private landscaping for that dwelling. (This area of indigenous vegetation is to be contained within the "Area of garden and lawn" for the dwelling specified in the "Description of Project" table).          | ~                   | ~                               |                   |
| (c) If a rating is specified in the table below for a fixture or appliance to be installed in the dwelling, the applicant must ensure that each such fixture and appliance meets the rating specified for it.  |                     | ~                               | ~                 |
| (d) The applicant must install an on demand hot water recirculation system which regulates all hot water use throughout the dwelling, where indicated for a dwelling in the "HW recirculation or diversion" column of the table below.   |                     | ~                               | ~                 |
| (e) The applicant must install:  |                     |                                 |                   |
| (aa) a hot water diversion system to all showers, kitchen sinks and all basins in the dwelling, where indicated for a dwelling in the "HW recirculation or diversion" column of the table below; and   |                     | <b>~</b>                        | ~                 |
| (bb) a separate diversion tank (or tanks) connected to the hot water diversion systems of at least 100 litres. The applicant must connect the hot water diversion tank to all toilets in the dwelling.   |                     | ~                               | ~                 |
| (e) The applicant must not install a private swimming pool or spa for the dwelling, with a volume exceeding that specified for it in the table below.  | ~                   | ~                               |                   |
| (f) If specified in the table, that pool or spa (or both) must have a pool cover or shading (or both).   |                     | ~                               |                   |
| (g) The pool or spa must be located as specified in the table.   | ~                   | ~                               |                   |
| (h) The applicant must install, for the dwelling, each alternative water supply system, with the specified size, listed for that dwelling in<br>the table below. Each system must be configured to collect run-off from the areas specified (excluding any area which supplies<br>any other alternative water supply system), and to divert overflow as specified. Each system must be connected as specified. | ~                   | ~                               | ~                 |

| (ii) Energy  | Show on<br>DA plans | Show on CC/CDC<br>plans & specs | Certifier<br>check |
|--|---------------------|---------------------------------|--------------------|
| (a) The applicant must comply with the commitments listed below in carrying out the development of a dwelling listed in a table below.   |                     |                                 |                    |
| (b) The applicant must install each hot water system specified for the dwelling in the table below, so that the dwelling's hot water is<br>supplied by that system. If the table specifies a central hot water system for the dwelling, then the applicant must connect that<br>central system to the dwelling, so that the dwelling's hot water is supplied by that central system.   | ~                   | ~                               | ~                  |
| (c) The applicant must install, in each bathroom, kitchen and laundry of the dwelling, the ventilation system specified for that room in<br>the table below. Each such ventilation system must have the operation control specified for it in the table.   |                     | ~                               | ~                  |
| (d) The applicant must install the cooling and heating system/s specified for the dwelling under the "Living areas" and "Bedroom<br>areas" headings of the "Cooling" and "Heating" columns in the table below, in/for at least 1 living/bedroom area of the dwelling. If<br>no cooling or heating system is specified in the table for "Living areas" or "Bedroom areas", then no systems may be installed in<br>any such areas. If the term "zoned" is specified beside an air conditioning system, then the system must provide for day/night<br>zoning between living areas and bedrooms. |                     | ~                               | ~                  |

| ii) Energy   | Show on<br>DA plans | Show on CC/CDC<br>plans & specs | Certifier<br>check |
|--|---------------------|---------------------------------|--------------------|
| (e) This commitment applies to each room or area of the dwelling which is referred to in a heading to the "Artificial lighting" column of<br>the table below (but only to the extent specified for that room or area). The applicant must ensure that the "primary type of artificial<br>lighting" for each such room in the dwelling is fluorescent lighting or light emitting diode (LED) lighting. If the term "dedicated" is<br>specified for a particular room or area, then the light fittings in that room or area must only be capable of being used for<br>fluorescent lighting or light emitting diode (LED) lighting. |                     | ~                               | ~                  |
| (f) This commitment applies to each room or area of the dwelling which is referred to in a heading to the "Natural lighting" column of<br>the table below (but only to the extent specified for that room or area). The applicant must ensure that each such room or area is<br>fitted with a window and/or skylight.  | ~                   | ~                               | ~                  |
| (g) This commitment applies if the applicant installs a water heating system for the dwelling's pool or spa. The applicant must:   |                     |                                 |                    |
| (aa) install the system specified for the pool in the "Individual Pool" column of the table below (or alternatively must not install any system for the pool). If specified, the applicant must install a timer, to control the pool's pump; and   |                     | ~                               |                    |
| (bb) install the system specified for the spa in the "Individual Spa" column of the table below (or alternatively must not install any system for the spa). If specified, the applicant must install a timer to control the spa's pump.  |                     | ~                               |                    |
| (h) The applicant must install in the dwelling:  |                     |                                 |                    |
| (aa) the kitchen cook-top and oven specified for that dwelling in the "Appliances & other efficiency measures" column of the table below;  |                     | ~                               |                    |

### 3. Commitments for common areas and central systems/facilities for the development (non-building specific)

#### (b) Common areas and central systems/facilities

| (i) Water   | Show on<br>DA plans | Show on CC/CDC<br>plans & specs | Certifier<br>check |
|---|---------------------|---------------------------------|--------------------|
| (a) If, in carrying out the development, the applicant installs a showerhead, toilet, tap or clothes washer into a common area, then that item must meet the specifications listed for it in the table.   |                     | ~                               | ~                  |
| (b) The applicant must install (or ensure that the development is serviced by) the alternative water supply system(s) specified in the<br>"Central systems" column of the table below. In each case, the system must be sized, be configured, and be connected, as<br>specified in the table. | ~                   | ~                               | ~                  |
| (c) A swimming pool or spa listed in the table must not have a volume (in kLs) greater than that specified for the pool or spa in the table.  | ~                   | ~                               |                    |
| (d) A pool or spa listed in the table must have a cover or shading if specified for the pool or spa in the table.   |                     | ~                               |                    |
| (e) The applicant must install each fire sprinkler system listed in the table so that the system is configured as specified in the table.   |                     | ~                               | ~                  |
| (f) The applicant must ensure that the central cooling system for a cooling tower is configured as specified in the table.  |                     | ~                               | ~                  |

| Common area      | Showerheads rating | Toilets rating     | Taps rating        | Clothes washers rating     |
|------------------|--------------------|--------------------|--------------------|----------------------------|
| All common areas | no common facility | no common facility | no common facility | no common laundry facility |

| ii) Energy   | Show on<br>DA plans | Show on CC/CDC<br>plans & specs | Certifier<br>check |
|--|---------------------|---------------------------------|--------------------|
| (a) If, in carrying out the development, the applicant installs a ventilation system to service a common area specified in the table<br>below, then that ventilation system must be of the type specified for that common area, and must meet the efficiency measure<br>specified.   |                     | ~                               | ~                  |
| (b) In carrying out the development, the applicant must install, as the "primary type of artificial lighting" for each common area<br>specified in the table below, the lighting specified for that common area. This lighting must meet the efficiency measure specified.<br>The applicant must also install a centralised lighting control system or Building Management System (BMS) for the common area,<br>where specified. |                     | ~                               | ~                  |
| (c) The applicant must install the systems and fixtures specified in the "Central energy systems" column of the table below. In each case, the system or fixture must be of the type, and meet the specifications, listed for it in the table.   | ~                   | ~                               | ~                  |
