

OPERATIONS PLAN

ACO Pty Ltd operates a facility at 134-140 Old Bathurst Road, EMU PLAINS, 2750. The business activities at the facility include the sale and distribution of products and systems for the purposes of:

- Surface Water Management
- Retention Systems
- Underground Access Systems
- Building Drainage
- Grease and Oil Separation Systems
- Secure Underground Closure Systems

The facility includes five individual manufacturing units which produce items generally in the categories listed above.

Normal trading activities occur from Monday to Friday between 8.00am and 4.30pm. Manufacturing and distribution activity occur from 5.00 am to 11.55pm Monday to Friday with work occasionally on Saturday up to 12 noon.

Typically 100 personnel are employed at the site in functions ranging from manufacturing to sales and administration.

When not in operation, the site is patrolled by an independent security firm. Any issues detected after hours are notified to a list of management personnel at the time of occurrence.

A manifesto of hazardous materials is maintained at the entry to the site for use by emergency services. Members of NSWFB from the nearby Regentville station attend on an annual basis to review the facility and check compliance.

All manufacturing activities are covered from a quality perspective under the international standard ISO9001-2016 to which ACO is accredited.

The site has an active WHS Committee which is convened at a monthly meeting to deal with any safety related matters in the operation. The Committee includes senior management delegates with the authority to make decisions involving expenditure and policy.
