EXECUTIVE SUMMARY

EnviroTech Pty. Ltd. was engaged by Kerrin Nuthall to conduct an Environmental Site Assessment at 110-112 Mount Vernon Road, Mount Vernon NSW 2178 (hereafter referred to as the site). The investigation is part of a development application for a proposed childcare centre.

The total area of the site is approximately 10250 m². A site inspection was carried out on Tuesday 26th March 2019 which involved a visual assessment of the accessible areas of the site and surrounding areas as well as the acquisition of representative soil samples. Details of the findings are presented within the body of this report, as well as an assessment of significance with regards to the findings of the investigation.

This report was completed in accordance with the *Guidelines for Consultants Reporting on Contaminated Sites, NSW EPA, September 2000*.

Based on the data and evidence collected during the site inspection and site history review, the findings of the Environmental Site Assessment are as follows:

1. On Tuesday 26th March 2019, a site inspection was conducted by Envirotech consultant Jack Hinchliffe;
2. At the time of inspection, the site consisted of a fenced off unoccupied and empty property. The majority of the site was comprised of disused market gardens;
3. At the north-eastern and southern portions of site were the footprint remains of sheds and a residential house that were previously demolished. Stockpiles were present at the southern portion of site;
4. The following area of concern were identified:
 - Previous historical site use as a market garden has the potential for OC/OP Pesticides to be impacting soils onsite;
 - Previously existing residential building and sheds originally constructed in an era to have comprised potentially hazardous building materials and incorrectly demolished;
 - Potentially unvalidated stockpiles onsite comprised of unknown building materials; and
 - The underlying soils onsite have the potential to be comprised of unknown fill material.
5. The site was first developed before 1955;
6. The site is not listed by the EPA;
7. Based on the available information, a targeted and stratified sampling plan was considered most appropriate to provide sufficient characterisation data. A total of twenty-one (21) test pits were nominated across the area of investigation (Figure 3);
8. Samples were analysed for Heavy Metals, Phenols, TRH, BTEX, PAH, Hydrocarbons, OC/OP Pesticides & Asbestos by ALS Environmental Division;
9. Soil chemical concentrations were below the thresholds of the adopted human health and ecological assessment criteria for residential land use as specified under the NEPM (2013);
10. Asbestos **WAS** detected in four (4) samples, ASB1 detected Chrysotile and Amosite Asbestos. ASB2, ASB3 and ASB6 detected Chrysotile, Amosite and Crocidolite Asbestos. Asbestos was not detected in any of the other samples;
11. It is recommended that a suitably trained professional is engaged to prepare a Remedial Action Plan to determine the remediation of the asbestos contamination within the contaminated areas (Figure 3) and appropriate remedial action; and
12. Subject to the above, it is considered that the site can be remediated for the proposed works.

1. INTRODUCTION

1.1 Background

EnviroTech Pty. Ltd. was engaged by Graham Mann to conduct an Environmental Site Assessment at 110-112 Mount Vernon Road, Mount Vernon NSW 2178 (hereafter referred to as the site). The investigation is part of a development application for a proposed childcare centre.

The total area of the site is approximately 10250 m². A site inspection was carried out on Tuesday 26th March 2019 which involved a visual assessment of the accessible areas of the site and surrounding areas as well as the acquisition of representative soil samples. Details of the findings are presented within the body of this report, as well as an assessment of significance with regards to the findings of the investigation.

This report was completed in accordance with the *Guidelines for Consultants Reporting on Contaminated Sites, NSW EPA, September 2000*.

1.2 Objectives

The objectives of this PSI were to:

1. Identify past and present potentially contaminating activities;
2. Identify potential contaminants of concern;
3. Provide a preliminary assessment of the condition of the site and potential for contamination; and
4. Assess the need for further investigation.

1.3 Scope of Works

The scope of works included the following:

1. Acquisition and review of available data comprising;
 - Cadastre & Topography
 - Aerial Imagery
 - EPA Contaminated Land
 - EPA Records of Notice
 - National Waste
 - Groundwater Bores
 - Geology & Soils
 - Planning Zones
2. A review of past and current site uses;
3. A review of past and current adjacent site uses;
4. A site inspection;
5. *Supplementary* soil sampling and analysis; and
6. Reporting in accordance with the associated legislations and guidelines.

1.4 Legislative Requirements

The legislative framework for the report is based on guidelines that have been set out by the NSW Environmental Protection Agency (EPA) formerly the Office of Environment and Heritage (OEH) in the form of the following Acts/Regulations:

1. *Protection of the Environment Operations Act (1997);*
2. *Protection of the Environment Operations Regulation (2008);*
3. *Contaminated Land Management Act (1998).*

In addition, the following guidelines and technical documents have been reviewed and applied where applicable:

1. *Guidelines for the NSW Site Auditor Scheme (NSW DEC, 2006).*
2. *Guidelines for Consultants Reporting on Contaminated Sites (NSW EPA, 2000).*
3. *Guidelines on the Investigation Levels for Soil and Groundwater, National Environmental Protection Measure 1999, 2013 Amendment (NEPC, 2013).*
4. *Australian Standard AS 4482.1 Guide to the sampling and investigation of potentially contaminated soil. Part 1: Non-volatile and semi-volatile compounds.*
5. *Australian Standard AS 4482.2 Guide to the sampling and investigation of potentially contaminated soil. Part 2: Volatile substances.*
6. *Sampling Design Guidelines (NSW EPA, 1995).*
7. *Waste Classification Guidelines Part 1: Classifying Waste (NSW DECCW, 2014).*
8. *Guidelines for Implementing the Protection of the Environment Operations (Underground*
9. *Petroleum Storage Systems) Regulation 2008 (NSW DECCW, 2009).*
10. *Guidelines for the Assessment and Management of Groundwater Contamination (NSW DEC, 2007).*

1.5 Context of report

This report is to be read in its entirety and should not be review in individual section to provide any level of information independently. Each section of the report relates to the rest of the document and as such is to be read in conjunction, including its appendices and attachments.

2. SITE IDENTIFICATION

The study site is 110-112 Mount Vernon Road, Mount Vernon NSW 2178 (Lot 4 DP865818) (Figure 1). It can be identified as a trapezoidal allotment north of Mount Vernon Road. Figure 2 shows an aerial photograph of the site and the surrounding land.

Table 1: Site Identification.

Street Address	110-112 Mount Vernon Road, Mount Vernon
Lot and DP Number	Lot 4 DP865818
Approx. Site Area	10250 m ²
Local Government Area	Penrith City Council
Zoning	E4 – Environmental Living
LGA Legislation	Penrith Local Environmental Plan 2010

Figure 1: Site location map (NSW Spatial Information Exchange).

3. PROPOSED DEVELOPMENT

The investigation is part of a development application for a proposed childcare centre.

Figure 2: Aerial photograph of the site and surrounding land (PhotoMaps by nearmap).

4. SITE DESCRIPTION

4.1 Site Inspection

On Tuesday 26th March 2019, a site inspection was conducted by Envirotech consultant Jack Hinchliffe. Field work was carried out in accordance with the methodology described in AS 4482.1 – 2005 and the NEPM (2013). At the time of inspection, the site consisted of a fenced off unoccupied and empty property. The majority of the site was comprised of disused market gardens. At the north-eastern and southern portions of site were the footprint remains of sheds and a residential house that were previously demolished. Stockpiles were present at the southern portion of site.

4.2 Surrounding Land Use

The site is located within a residential setting and bordered by:

- Residential allotments surround the site in all directions; and
- Market Gardens surround the site east, west and south;

4.3 Topography

The site occupies a gentle south-east facing slope.

4.4 Geology and Soils

The department of environment soil map shows the site is within a Blacktown Soil Landscape characterised by gently undulating rises on Wianamatta Group shales. Local relief to 30 m, slopes usually >5%. Broad rounded crests and ridges with gently inclined slopes. Cleared Eucalypt woodland and tall open-forest (dry sclerophyll forest). Soils generally consist of friable brownish black loam transitioning to moderately to light grey plastic mottled clay.

4.5 Surface Water Hydrology

No groundwater or distinct overland flow paths were noted during the investigation. Stormwater is expected to infiltrate into soils or sheet south into the stormwater drainage system at Mount Vernon Road.

4.6 Hydrogeology

A search of the State Department of Primary Industries Groundwater map showed no groundwater works within 500m of the site.

4.7 Acid Sulphate Soils

The site is not located in an Acid Sulfate Class soil area.

5. CONCEPTUAL SITE MODEL (CSM)

5.1 Areas of Concern

- Previous historical site use as a market garden has the potential for OC/OP Pesticides to be impacting soils onsite;
- Previously existing residential building and sheds originally constructed in an era to have comprised potentially hazardous building materials and incorrectly demolished;
- Potentially unvalidated stockpiles onsite comprised of unknown building materials; and
- The underlying soils onsite have the potential to be comprised of unknown fill material.

Table 2 identifies the main Areas of Environmental Concern (AECs), and their associated Contaminants of Concern (COCs), using the information gathered through this assessment and qualitative judgement based on consultant experience.

Table 2: Areas of Environmental Concern (**Derived from AS 4482.1-2005 and consultant experience*).

AEC	Potentially Contaminating Activity	Contaminants of Concern	Likelihood of Contamination**
Historical market garden site use.	Potential OC/OP Pesticides impacting soils.	• OC/OP Pesticides.	Possible.
Previously existing residential buildings and sheds	Originally constructed in an era to contain hazardous building materials and incorrectly demolished.	• Asbestos; and • Heavy Metals.	Possible.
Stockpiles of soil and building material onsite.	Stockpiles containing unknown materials.	• Asbestos; • Heavy Metals; • Hydrocarbons; and • OC/OP Pesticides.	Possible.
Underlying soils potentially comprised of fill material.	Potentially contaminated fill material.	• Asbestos; • Heavy Metals; • Hydrocarbons; and • OC/OP Pesticides.	Possible.

5.2 Receptors and Sensitive Environments

Surrounding residential properties, occupants of the future development and construction workers during the construction process are the main receptors. Sensitive environments would include the flora and fauna that surround the site in all directions.

5.3 Potential for Migration and Exposure of Contaminants

There is potential for contaminants within underlying soils to migrate via groundwater as stormwater infiltration and transport any contaminants such as heavy metals through the water column. Exposure routes of contaminants could potentially be through direct contact with exposed underlying soils in solid (Heavy Metals, Asbestos), liquids (Hydrocarbons), dust (Asbestos) and vapour (Phenols and VOCs). Dermal and oral contact of soils and shallow groundwater, contaminant uptake by vegetation (Heavy Metals, OC/OP Pesticides). These risks will most likely be at its highest risk potential during any earthworks or construction onsite.

6. SITE RECORDS

A search of 110-112 Mount Vernon Road, Mount Vernon NSW 2178 on the following records was undertaken by Jack Hinchliffe. A full list of recorded sites within a 1 km radius is provided within (Appendix A).

6.1 List of NSW Contaminated Sites - Notified to the EPA

- No records in buffer.

6.2 List of NSW Contaminated Sites - Record of Notices

- No records in buffer.

6.3 National Waste Management Site Database

- No records in buffer.

6.4 List of Current EPA Licensed Activities

- No records in buffer.

6.5 Delicensed Activities still regulated by the EPA

- No records in buffer.

6.6 Former Licensed Activities under the POEO Act 1997 now surrendered

- Licence # 4653. Lührman Environment Management PTY LTD – Location: Waterways Through NSW – Other Activities / Non-Scheduled Activity - Application of Herbicides – Distance: 79m.
- Licence # 4838. Robert Orchard LTD – Location: Various Waterways Throughout NSW – Sydney 2000 – Other Activities / Non-Scheduled Activity - Application of Herbicides – Distance: 79m;
- Licence # 5150. Fairfield City Council – Location: Waterways of Fairfield City Council, Fairfield NSW 2165 – Other Activities / Non-Scheduled Activity - Application of Herbicides – Distance: 79m; and
- Licence # 6630. Sydney Weed and Pest Management Pty Ltd – Location: Waterways throughout NSW, Pest Management Pty Ltd – Other Activities / Non-Scheduled Activity - Application of Herbicides – Distance: 79m.

6.7 Historical Business Directories Premise Match

- No records in buffer.

6.8 Historical Business Directories Road Match

- No records in buffer.

6.9 Section 10.7 Certificate

- A search of the section 10.7 certificate has not been undertaken. A review of the certificate with regards to Matters arising under the Contaminated Land Management Act 1997 and the Contaminated Land Management Amendment Act 2008 should be undertaken concurrently with the review of this report.

7. SITE HISTORY

7.1 Aerial Photographs

A review of aerial photographs provided by Lotsearch (Appendix A) was undertaken. The results of which are summarized in Table 3.

Table 3: Findings of the historical photograph review.

Year	Description
1955	• Low resolution black and white photo; • Site appears to be an empty land. • No residential building in any direction of site. • Surrounding area is all empty land.
1961	• Low resolution black and white photo; • Shed present at north-eastern portion of site. • A dam is present along the western boundary of site. • Roads now bisect the site to access areas surrounding the site. • six dams look to surround the property in the north, north-west, and east direction.
1965	• Low resolution black and white photo; • A market garden along the western boundary and along the northern boundary. • Buildings to the south-west and west of site have been constructed.
1970	• Low resolution black and white photo; • Majority of site is now comprised of market gardens. • Residential buildings surround the east, south and west of site. • A few outbuildings have been constructed on site at the north-eastern area of site.
1982	• Moderate resolution colour photo; • Building at the front of property has been constructed. • More residential dwellings have been constructed around the site. • Sheds at north-eastern portion of site have been demolished and replaced by a new development. • Site appears to be no longer utilised as a market garden. • Site appears to be connected to property north of site.
1991	• Moderate resolution colour photo; • Commercial planting equipment looks to be installed to the property in the west direction. • Land to the north is still unoccupied • No major changes to the site.
2004	• High resolution colour photo; • Empty land in the north has been used with the construction of residential buildings. • Commercial equipment in the west has been removed and subdivided with a residential building being constructed on it. • Property directly behind the site in the north has been reconstructed. • Site has been separated from northern property.

2009	• High resolution colour photo; • Site is once again utilised as a market garden at northern half of site. • Property to the south west landscape has been altered.
------	---

7.2 Information Gaps

A site history has been established using the various sources as outlined above. However, the following information gaps have been identified:

1. Dry Cleaners, Motor Garages & Service Stations from UBD Business Directories, mapped to a road or an area, within the dataset buffer are mapped to the road when a building number is not supplied, cannot be found, or the road has been renumbered since the directory was published;
2. Inferences have been drawn based on 'point in time' aerial photographs;
3. No information pertaining to the site pre-1955 was available; and

Regarding the information available, it is considered that the quality of the information is consistent the industry standard and that the information is of high integrity with respect to the historical use of the site overall.

8. SOIL SAMPLING AND ANALYSIS

8.1 Data Quality Objectives

Data quality objectives were established for the site characterisation works, following the decision-making procedures outlined in NEPC (2013):

1. Define the problem;
2. Identify the decision;
3. Identify inputs to the decision;
4. Define the study boundaries;
5. Develop a decision rule;
6. Specify limits on decision errors; and
7. Optimise the design for obtaining data.

8.2 Define the Problem

The underlying soils onsite have the potential to be impacted by previous historical land use as a market garden and the potential incorrect demolition of a previously existing residential building and sheds originally constructed in an era to have comprised potentially hazardous building materials. As well as the current potentially unvalidated stockpiles onsite comprised of unknown building materials and underlying soils onsite being comprised of unknown and potentially contaminated fill material.

8.3 Identify the Decision

Based on the decision-making process for assessing urban redevelopment sites, the following decisions must be made:

1. Are there any unacceptable health risks to future onsite receptors?
2. Are there any unacceptable ecological risks posed by the site?
3. Are there any aesthetic issues at the site?
4. Is there any evidence of, or potential for, migration of contaminants from the site?
5. Is a site management strategy required?

8.4 Identify Inputs to the Decision

The following inputs were used to allow the assessment of the decisions:

1. Historical information;
2. Observations made during site investigations;
3. Soil analytical data from samples collected on site;
4. Adopted site assessment criteria; and
5. Data quality indicators.

8.5 Define the Study Boundaries

The study site is 110-112 Mount Vernon Road, Mount Vernon NSW 2178 (Lot 4 DP865818) (Figure 1). It can be identified as an irregularly shaped rectangular allotment.

8.6 Develop a Decision Rule

Soil analytical data were assessed against National Environmental Protection Measure (NEPM) criteria as identified in Section 8. Statistical analysis of the data will be undertaken if necessary. The following statistical criteria shall be adopted:

1. The upper 95% confidence limit on the average concentration for each analyte (calculated for samples collected from consistent soil horizons, stratigraphy or material types) must be below the adopted criterion;
2. No single analyte shall exceed 250% of the adopted criterion; and
3. The standard deviation of the results must be below 50 % of the criterion.

8.7 Specify Limits of Decision Errors

Data generated during the project must be appropriate to allow decisions to be made with confidence. The acceptable limit on decision error is 95 % compliance with data quality indicators.

8.8 Optimize Design for Obtaining Data

Based on the available information, a targeted and stratified sampling plan was considered most appropriate to provide sufficient characterisation data. A total of twenty-one (21) test pits were nominated across the area of investigation (Figure 3).

8.9 Soil Sample Methodology

Soil samples were collected on Tuesday 26th March 2018 via test pitting. Samples were collected from approximately 0 - 500 mm depth using a simple mattock. No Groundwater was encountered in soil profile samples. Asbestos grab samples were taken by carefully removing soil within test pits.

During the collection of soil samples, any features such as seepage, discoloration, staining, odours, or other physical indicators of contamination were noted. All site work was undertaken by Jack Hinchliffe, Environmental Scientist of Envirotech. Soil Samples were transferred directly from the test pits into laboratory supplied 250 mL sample jars sealed with Teflon lids. Asbestos samples were collected in asbestos sample bags and zip locked. The samples were stored in a chilled esky and transferred to ALS Environmental Division under stringent chain of custody (COC) procedures.

8.10 Laboratory Analysis

The laboratory used for the analysis of all samples was ALS Environmental located at 277-289 Woodpark Road, Smithfield NSW Australia. The laboratory is NATA accredited for the selected analyses. The completed analysis schedule is summarised in Table 4 below providing a diverse range of analytes:

Table 4: Analytical Schedule.

Sample ID	Location	Analytes
TP1-21	Top 500mm of potential fill material around the area of investigation (Figure 3).	• Heavy Metals • Hydrocarbons • OC/OPs

ASB1-6	Top 500mm within the footprints of demolished house and sheds onsite (Figure 3).	Asbestos
--------	--	--

Figure 3: Site sampling plan showing location of the twenty-one (21) test pits (yellow) with the concurrent asbestos sampling (blue). (enhanced image Appendix B).

9. SITE ASSESSMENT CRITERIA

Concentrations of contaminants in soil samples were compared against the National Environmental Protection Council (2013) site assessment criteria presented below and summarised in Table 5:

1. *Health Investigation Levels (HIL) for Soil Contaminants – HIL A; Residential with garden/accessible soil (home grown produce <10% fruit and vegetable intake (no poultry), also includes childcare centres, preschools and primary schools.*
2. *Soil Health Screening Levels (HSL) for Vapour Intrusion – Residential A & B;*
3. *Management Limits for TRH Fractions F1-F4 in Soil - Residential, Parkland and Public Open Space (Fine Grained Soils); and*
4. *Health Screening Levels for Asbestos Contamination in Soil – HIL A & Residential with garden/accessible soil (home grown produce <10% fruit and vegetable intake (no poultry), also includes childcare centres, preschools and primary schools.*

Table 5: Adopted Human Health Based Soil Criteria and Hydrocarbon Management Limits (all units in mg/kg)

	Limit of Reporting	Health Screening Levels	Environmental Screening Levels	Management Limits

10. QUALITY ASSURANCE / QUALITY CONTROL

10.1 Site Procedures

The following field quality assurance and quality control measures were implemented:

1. All sample jars and sample bags were clearly labelled prior to site visit;
2. All soil samples were collected by hand (after shallow excavation using a clean mattock);
3. Disposable gloves were worn throughout the process and changed between the collection of each soil sample;
4. All sampled jars and bags were immediately placed in an ice-block chilled esky;
5. All samples were clearly labelled and sealed for couriering;
6. The ALS Environmental chain-of-custody form was completed and emailed to the lab as well as a hard copy placed with the samples;
7. All samples were kept in the office of Envirotech Pty Ltd until collected by courier; and
8. Ice-blocks were interchanged prior to couriering.

10.2 Laboratory

The following is an extract from the quote for service provided by ALS Environmental Division.

“ALS has a comprehensive QA/QC program. Our QA/QC procedures are designed to provide reliable and defensible analytical results. Our analytical services are based on internal QCS3 schedule, which includes Laboratory Control Samples (LCS), Method Blanks (MB), Matrix Spikes (MS), Laboratory Duplicates (Dups) and Surrogates (for target organics) where applicable, at frequencies at or above that detailed in the 1999 NEPM guidelines.

The basis of the QCS3 Schedule is the ‘analytical lot’ (process analytical batch) of samples. Generally, the laboratory processes samples of similar matrices in groups called ‘Lots’. ‘Lots’ are made up of 20 samples that may consist of several discrete batches, and may be independent of project and / or client. The selection of samples for QC purposes will be biased towards the larger batches within the process lot” ...

The following summarizes the frequency that QC samples are processed:

1. 5% Method Blanks (MB) –1 analyzed within each process lot of 20 samples.
2. 10% Laboratory Duplicates (Dups) –2 analyzed within each process lot of 20 samples.
3. 5% Laboratory Control Samples (LCS) –1 analyzed within each process lot of 20 samples.
4. 5% Matrix Spikes (MS) – 1 analyzed within each process lot of 20 samples (except for dioxins).
5. Surrogate Spikes on all ‘target’ organics analyses.

10.3 QA/QC Results

10.3.1 Site

1. All soil samples arrived at ALS Environmental within specified holding times;
2. All soil samples arrived at ALS Environmental within specified temperature requirements;
3. No potential OHS incidents were recorded on site;
4. No quality assurance incidents (such as cross contamination or similar) were recorded.

10.3.2 Lab

ALS Environmental Division provided a Quality Control Report and Interpretive Quality Control Report (Appendix C) Those Quality Control Reports contain the following information:

1. A Laboratory Duplicate (DUP) Report - referring to a randomly selected intra-laboratory split. Laboratory duplicates provide information regarding method precision and sample heterogeneity. For all matrices, no Duplicate outliers occurred.
2. A Method Blank (MB) Report - referring to an analyte free matrix to which all reagents are added in the same volumes or proportions as used in standard sample preparation. The purpose of this QC parameter is to monitor potential laboratory contamination. For all matrices, no Method Blank outliers occurred.
3. Laboratory Control Spike (LCS) Report - referring to a certified reference material, or a known interference free matrix spiked with target analytes. The purpose of this QC parameter is to monitor method precision and accuracy independent of sample matrix. For all matrices, no Laboratory Control outliers occurred.
4. A Matrix Spike (MS) Report – referring to an intra-laboratory split sample spiked with a representative set of target analytes. The purpose of this QC parameter is to monitor potential matrix effects on analyte recoveries. For all matrices, no Matrix Spike outliers occurred.
5. An Analysis Holding Time Compliance Report - No Analysis Holding Time outliers exist.
6. A Frequency of Quality Control Samples Report - No Quality Control Frequency Outliers exist.

10.4 QA/QC Conclusions

The field sampling and handling procedures across the site produced QA/QC results which indicate that the soil data collected is of acceptable quality and suitable for use in site characterisation.

The NATA certified laboratory reports indicate that the laboratory was generally achieving levels of performance within its recommended control limits during the period when the samples from this program were analyzed.

On this basis of the results and the laboratory QA/QC program, the soil data is of an acceptable quality upon which to draw conclusions regarding the environmental condition of the site.

11. RESULTS

11.1 Areas of Concern

The following areas of environmental concern were identified:

- Previous historical site use as a market garden has the potential for OC/OP Pesticides to be impacting soils onsite;
- Previously existing residential building and sheds originally constructed in an era to have comprised potentially hazardous building materials and incorrectly demolished;
- Potentially unvalidated stockpiles onsite comprised of unknown building materials; and
- The underlying soils onsite have the potential to be comprised of unknown fill material.

11.2 Soil Laboratory Results

Detailed laboratory reports and chain of custody documentation are provided in Appendix C. Laboratory results are summarized in Tables 6 and 7 and discussed in the following sections in relation to the adopted assessment criteria. The results were as follows:

1. Heavy Metals: All samples were reported by the laboratory to have concentrations below the adopted site assessment criteria.
2. TRH: All samples were reported by the laboratory to have concentrations below the adopted site assessment criteria.
3. BTEX: All samples were reported by the laboratory to have concentrations below the adopted site assessment criteria.
4. PAH: All samples were reported by the laboratory to have concentrations below the adopted site assessment criteria.
5. OC/OP Pesticides: All samples were reported by the laboratory to have concentrations below the adopted site assessment criteria.
6. Phenols: All samples were reported by the laboratory to have concentrations below the adopted site assessment criteria.
7. Asbestos: Asbestos **WAS** detected in four (4) of the six (6) samples:
 - **ASB1:** Chrysotile & Amosite Asbestos; and
 - **ASB2, ASB3 & ASB6:** Chrysotile, Amosite & Crocidolite Asbestos.

Table 6: Summary of soil sample results from site investigation.

Analyte	NSW DEC Health-based Investigation Levels, HIL A (mg/kg)	Ecological Screening Level – urban residential and public open space	Maximum concentration detected (mg/kg)	Average concentration detected (mg/kg)	95% UCL	Acceptability
Metals and Inorganics

Pentachlorophenol	100	100	N/D	N/D	N/A	Acceptable

N/D = Non-Detect N/A = Not Applicable

All soil samples tested were reported by the laboratory to have concentrations below the adopted site assessment criteria for HIL A, as per the NEPM, 2013.

Table 7: Summary of Asbestos Results.

Sample ID	Presence/Non-Presence	Types of Asbestos: Chrysotile (Ch), Amosite (Am), Crocidolite (Cr)
ASB1 (TP6)	Present	Ch + Am
ASB2 (TP7)	Present	Ch + Am + Cr
ASB3 (TP8)	Present	Ch + Am + Cr
ASB4 (TP17)	Not present	-
ASB5 (TP18)	Not present	-
ASB6 (TP19)	Present	Ch + Am + Cr

Asbestos **WAS** detected in four (4) of the six (6) samples.

12. DISCUSSION

12.1 Soil Laboratory Results

All soil samples tested were reported by the laboratory to have concentrations below the adopted site assessment criteria for HIL A Residential site use, as per the NEPM, 2013.

Four (4) samples indicated the presence Asbestos, ASB1 detected Chrysotile and Amosite Asbestos. ASB2, ASB3 and ASB6 detected Chrysotile, Amosite and Crocidolite Asbestos. Asbestos was not detected in any of the other samples.

12.2 Potential Risks to Onsite Receptors

Human exposure to the potential contaminants identified is currently considered *Moderate* as:

- The site is privately owned;
- The site is not publicly accessible;
- The soils throughout site are currently exposed as grassland; and
- The contaminants tested for have indicated concentrations **ABOVE** the adopted site assessment threshold

Human exposure to the potential contaminants identified would increase to *High* following the commencement of any further earthworks and development.

12.3 Potential for Migration of Contaminants

The potential for migration is currently considered *Moderate* as the soils throughout site are currently exposed and have the potential for dust formation and stormwater run-off into neighbouring allotments and dams neighbouring site.

Migration potential for the contaminants identified would increase to *High* following the disruption of the underlying soils and subsequent dust formation and stormwater runoff as a result of any potential excavations and construction.

12.4 Recommendations

It is recommended that a suitably trained professional is engaged to prepare a Remedial Action Plan to determine the remediation of the asbestos contamination within the contaminated areas (Figure 3) and appropriate remedial action.

Subject to the above, it is considered that the site can be remediated for the proposed works.

13. CONCLUSIONS

Based on the data and evidence collected during the site inspection and site history review, the findings of the Environmental Site Assessment are as follows:

1. On Tuesday 26th March 2019, a site inspection was conducted by Envirotech consultant Jack Hinchliffe;
2. At the time of inspection, the site consisted of a fenced off unoccupied and empty property. The majority of the site was comprised of disused market gardens;
3. At the north-eastern and southern portions of site were the footprint remains of sheds and a residential house that were previously demolished. Stockpiles were present at the southern portion of site;
4. The following area of concern were identified:
 - Previous historical site use as a market garden has the potential for OC/OP Pesticides to be impacting soils onsite;
 - Previously existing residential building and sheds originally constructed in an era to have comprised potentially hazardous building materials and incorrectly demolished;
 - Potentially unvalidated stockpiles onsite comprised of unknown building materials; and
 - The underlying soils onsite have the potential to be comprised of unknown fill material.
5. The site was first developed before 1955;
6. The site is not listed by the EPA;
7. Based on the available information, a targeted and stratified sampling plan was considered most appropriate to provide sufficient characterisation data. A total of twenty-one (21) test pits were nominated across the area of investigation (Figure 3);
8. Samples were analysed for Heavy Metals, Phenols, TRH, BTEX, PAH, Hydrocarbons, OC/OP Pesticides & Asbestos by ALS Environmental Division;
9. Soil chemical concentrations were below the thresholds of the adopted human health and ecological assessment criteria for residential land use as specified under the NEPM (2013);
10. Asbestos **WAS** detected in four (4) samples, ASB1 detected Chrysotile and Amosite Asbestos. ASB2, ASB3 and ASB6 detected Chrysotile, Amosite and Crocidolite Asbestos. Asbestos was not detected in any of the other samples;
11. It is recommended that a suitably trained professional is engaged to prepare a Remedial Action Plan to determine the remediation of the asbestos contamination within the contaminated areas (Figure 3) and appropriate remedial action; and
12. Subject to the above, it is considered that the site can be remediated for the proposed works.

14. LIMITATIONS STATEMENT

EnviroTech Pty. Ltd. Pty. Ltd. has undertaken the following report in accordance with the scope of works set out between EnviroTech Pty. Ltd. and the client. EnviroTech Pty. Ltd. derived the data in this report primarily from the site and soil assessment conducted on the date of site inspection. The impacts of future events may require future investigation of the site and subsequent data analysis, together with a re-evaluation of the conclusions and recommendations of this report.

In preparing this report, EnviroTech Pty. Ltd has relied upon, and assumed accurate, certain site information provided by the client and other persons. Except as otherwise stated in the report, we have not attempted to verify the accuracy or completeness of any such information. EnviroTech Pty. Ltd. accepts no liability or responsibility whatsoever for or in respect to any use or reliance upon this report by any third party.

The information contained within this report have been prepared exclusively for the client. Envirotech have prepared the report to address the risk associated with scale of the works. The report has been prepared with a degree of care and skill ordinarily exercised in similar investigations by reputable members of the environmental industry in Australia. No other warranty, expressed or implied, is made or intended. This report is to be read in its entirety including attachments and appendices and should not read in individual sections.

A third party should not rely upon the information prior to making an assessment that the scope of work conducted meets their specific needs. Envirotech cannot be held liable for third party reliance on this document.

Envirotech's professional opinions are based upon its professional judgment, experience, training and results from analytical data. In some cases, further testing and analysis may be required, thus producing different results and/or opinions. Envirotech Pty Ltd has limited its investigation to the scope agreed upon with its client.

Location Confidences

Where Lotsearch has had to georeference features from supplied addresses, a location confidence has been assigned to the data record. This indicates a confidence to the positional accuracy of the feature. Where applicable, a code is given under the field heading “LC” or “LocConf”. These codes lookup to the following location confidences:

LC Code	Location Confidence
Premise match	Georeferenced to the site location / premise or part of site
General area or suburb match	Georeferenced with the confidence of the general/approximate area
Road match	Georeferenced to the road or rail
Road intersection	Georeferenced to the road intersection
Feature is a buffered point	Feature is a buffered point
Land adjacent to geocoded site	Land adjacent to Georeferenced Site
Network of features	Georeferenced to a network of features

Contaminated Land & Waste Management Facilities

110-112 Mount Vernon Road, Mount Vernon, NSW 2178

List of NSW contaminated sites notified to EPA

Records from the NSW EPA Contaminated Land list within the dataset buffer:

Map Id	Site	Address	Suburb	Activity	Management Class	Status	Location Confidence	Dist (m)	Direction
N/A	No records in buffer								

The values within the EPA site management class in the table above, are given more detailed explanations in the table below:

EPA site management class	Explanation
Contamination being managed via the planning process (EP&A Act)	The EPA has completed an assessment of the contamination and decided that the contamination is significant enough to warrant regulation. The contamination of this site is managed by the consent authority under the Environmental Planning and Assessment Act 1979 (EP&A Act) planning approval process, with EPA involvement as necessary to ensure significant contamination is adequately addressed. The consent authority is typically a local council or the Department of Planning and Environment.
Contamination currently regulated under CLM Act	The EPA has completed an assessment of the contamination and decided that the contamination is significant enough to warrant regulation under the Contaminated Land Management Act 1997 (CLM Act). Management of the contamination is regulated by the EPA under the CLM Act. Regulatory notices are available on the EPA's Contaminated Land Public Record of Notices.
Contamination currently regulated under POEO Act	The EPA has completed an assessment of the contamination and decided that the contamination is significant enough to warrant regulation. Management of the contamination is regulated under the Protection of the Environment Operations Act 1997 (POEO Act). The EPA's regulatory actions under the POEO Act are available on the POEO public register.
Contamination formerly regulated under the CLM Act	The EPA has determined that the contamination is no longer significant enough to warrant regulation under the Contaminated Land Management Act 1997 (CLM Act). The contamination was addressed under the CLM Act.
Contamination formerly regulated under the POEO Act	The EPA has determined that the contamination is no longer significant enough to warrant regulation. The contamination was addressed under the Protection of the Environment Operations Act 1997 (POEO Act).
Contamination was addressed via the planning process (EP&A Act)	The EPA has determined that the contamination is no longer significant enough to warrant regulation. The contamination was addressed by the appropriate consent authority via the planning process under the Environmental Planning and Assessment Act 1979 (EP&A Act).
Ongoing maintenance required to manage residual contamination (CLM Act)	The EPA has determined that ongoing maintenance, under the Contaminated Land Management Act 1997 (CLM Act), is required to manage the residual contamination. Regulatory notices under the CLM Act are available on the EPA's Contaminated Land Public Record of Notices.
Regulation being finalised	The EPA has completed an assessment of the contamination and decided that the contamination is significant enough to warrant regulation under the Contaminated Land Management Act 1997. A regulatory approach is being finalised.
Regulation under the CLM Act not required	The EPA has completed an assessment of the contamination and decided that regulation under the Contaminated Land Management Act 1997 is not required.
Under assessment	The contamination is being assessed by the EPA to determine whether regulation is required. The EPA may require further information to complete the assessment. For example, the completion of management actions regulated under the planning process or Protection of the Environment Operations Act 1997. Alternatively, the EPA may require information via a notice issued under s77 of the Contaminated Land Management Act 1997 or issue a Preliminary Investigation Order.

UPSS Sensitive Zones

110-112 Mount Vernon Road, Mount Vernon, NSW 2178

Historical Business Directories

110-112 Mount Vernon Road, Mount Vernon, NSW 2178

1991 Business to Business Directory Records Premise or Road Intersection Matches

Records from the 1991 UBD Business to Business Directory, mapped to a premise or road intersection, within the dataset buffer:

Map Id	Business Activity	Premise	Ref No.	Location Confidence	Distance to Property Boundary or Road Intersection	Direction
	No records in buffer					

Business Directory Content Derived from Universal Business Directories (UBD) - Licensed from Hardie Grant

1991 Business to Business Directory Records Road or Area Matches

Records from the 1991 UBD Business to Business Directory, mapped to a road or an area, within the dataset buffer. Records are mapped to the road when a building number is not supplied, cannot be found, or the road has been renumbered since the directory was published:

Map Id	Business Activity	Premise	Ref No.	Location Confidence	Distance to Road Corridor or Area
	No records in buffer				

Business Directory Content Derived from Universal Business Directories (UBD) - Licensed from Hardie Grant

Historical Business Directories

110-112 Mount Vernon Road, Mount Vernon, NSW 2178

1986 Business to Business Directory Records Premise or Road Intersection Matches

Records from the 1986 UBD Business to Business Directory, mapped to a premise or road intersection, within the dataset buffer:

Map Id	Business Activity	Premise	Ref No.	Location Confidence	Distance to Property Boundary or Road Intersection	Direction
	No records in buffer					

Business Directory Content Derived from Universal Business Directories (UBD) - Licensed from Hardie Grant

1986 Business to Business Directory Records Road or Area Matches

Records from the 1986 UBD Business to Business Directory, mapped to a road or an area, within the dataset buffer. Records are mapped to the road when a building number is not supplied, cannot be found, or the road has been renumbered since the directory was published:

Map Id	Business Activity	Premise	Ref No.	Location Confidence	Distance to Road Corridor or Area
	No records in buffer				

Business Directory Content Derived from Universal Business Directories (UBD) - Licensed from Hardie Grant

Historical Business Directories

110-112 Mount Vernon Road, Mount Vernon, NSW 2178

1982 Business Directory Records Premise or Road Intersection Matches

Records from the 1982 UBD Business Directory, mapped to a premise or road intersection, within the dataset buffer:

Map Id	Business Activity	Premise	Ref No.	Location Confidence	Distance to Property Boundary or Road Intersection	Direction
	No records in buffer					

Business Directory Content Derived from Universal Business Directories (UBD) - Licensed from Hardie Grant

1982 Business Directory Records Road or Area Matches

Records from the 1982 UBD Business Directory, mapped to a road or an area, within the dataset buffer. Records are mapped to the road when a building number is not supplied, cannot be found, or the road has been renumbered since the directory was published:

Map Id	Business Activity	Premise	Ref No.	Location Confidence	Distance to Road Corridor or Area
	No records in buffer				

Business Directory Content Derived from Universal Business Directories (UBD) - Licensed from Hardie Grant

Historical Business Directories

110-112 Mount Vernon Road, Mount Vernon, NSW 2178

1970 Business Directory Records Premise or Road Intersection Matches

Records from the 1970 UBD Business Directory, mapped to a premise or road intersection, within the dataset buffer:

Map Id	Business Activity	Premise	Ref No.	Location Confidence	Distance to Property Boundary or Road Intersection	Direction
	No records in buffer					

Business Directory Content Derived from Universal Business Directories (UBD) - Licensed from Hardie Grant

1970 Business Directory Records Road or Area Matches

Records from the 1970 UBD Business Directory, mapped to a road or an area, within the dataset buffer. Records are mapped to the road when a building number is not supplied, cannot be found, or the road has been renumbered since the directory was published:

Map Id	Business Activity	Premise	Ref No.	Location Confidence	Distance to Road Corridor or Area
	No records in buffer				

Business Directory Content Derived from Universal Business Directories (UBD) - Licensed from Hardie Grant

Historical Business Directories

110-112 Mount Vernon Road, Mount Vernon, NSW 2178

1961 Business Directory Records Premise or Road Intersection Matches

Records from the 1961 UBD Business Directory, mapped to a premise or road intersection, within the dataset buffer:

Map Id	Business Activity	Premise	Ref No.	Location Confidence	Distance to Property Boundary or Road Intersection	Direction
	No records in buffer					

Business Directory Content Derived from Universal Business Directories (UBD) - Licensed from Hardie Grant

1961 Business Directory Records Road or Area Matches

Records from the 1961 UBD Business Directory, mapped to a road or an area, within the dataset buffer. Records are mapped to the road when a building number is not supplied, cannot be found, or the road has been renumbered since the directory was published:

Map Id	Business Activity	Premise	Ref No.	Location Confidence	Distance to Road Corridor or Area
	No records in buffer				

Business Directory Content Derived from Universal Business Directories (UBD) - Licensed from Hardie Grant

Historical Business Directories

110-112 Mount Vernon Road, Mount Vernon, NSW 2178

1950 Business Directory Records Premise or Road Intersection Matches

Records from the 1950 UBD Business Directory, mapped to a premise or road intersection, within the dataset buffer:

Map Id	Business Activity	Premise	Ref No.	Location Confidence	Distance to Property Boundary or Road Intersection	Direction
	No records in buffer					

Business Directory Content Derived from Universal Business Directories (UBD) - Licensed from Hardie Grant

1950 Business Directory Records Road or Area Matches

Records from the 1950 UBD Business Directory, mapped to a road or an area, within the dataset buffer. Records are mapped to the road when a building number is not supplied, cannot be found, or the road has been renumbered since the directory was published:

Map Id	Business Activity	Premise	Ref No.	Location Confidence	Distance to Road Corridor or Area
	No records in buffer

Soils

110-112 Mount Vernon Road, Mount Vernon, NSW 2178

Atlas of Australian Soils

Soil mapping units and Australian Soil Classification orders within the dataset buffer:

Map Unit Code	Soil Order	Map Unit Description	Distance
Pb12	Kurosol	Gently rolling to rounded hilly country with some steep slopes and broad valleys: chief soils are hard acidic red soils (Dr2.21) with hard neutral and acidic yellow mottled soils (Dy3.42 and Dy3.41) on lower slopes and in valleys. Associated are small areas of various soils including (Gn3.54) on some ridges, (Dr3.31) on some slopes; (Dr2.23) in saddles and some mid-slope positions, and some low-lying swampy areas of (Uf6) soils and (Uc1.2) soils with peaty surfaces. Small areas of other soils such as (Db1.2) are likely throughout.	0m
Pb13	Kurosol	Ridge and valley country of gently undulating ridge tops and steep side slopes often with slumping, also rounded hilly to steep hilly areas and relatively narrow valleys: chief soils are hard acidic red soils (Dr2.21) with hard acidic yellow mottled soils (Dy3.41); in places some ironstone gravels occur in both these soils. Associated are hard neutral and alkaline red soils (Dr2.22 and Dr2.23) in saddles and some mid-slope positions; (Dy3.42 and Dy3.43) soils, usually in depressions; and small areas of undescribed soils in wet soaks and valley areas. Small areas of other soils are likely throughout.	154m

Remnant Vegetation of the Cumberland Plain

What remnant vegetation of the Cumberland Plain exists within the dataset buffer?

Description	Crown Cover	Distance	Direction
10 - Shale Plains Woodland	Crown cover less than 10%	0m	Onsite
9 - Shale Hills Woodland	Crown cover less than 10%	0m	Onsite
9 - Shale Hills Woodland	Crown cover greater than 10%	135m	South
10 - Shale Plains Woodland	Crown cover less than 10% (urban areas)	222m	North
11 - Alluvial Woodland	Crown cover less than 10%	625m	East
11 - Alluvial Woodland	Crown cover greater than 10%	850m	East

USE OF REPORT - APPLICABLE TERMS

The following terms apply to any person (End User) who is given the Report by the person who purchased the Report from Lotsearch Pty Ltd (ABN: 89 600 168 018) (Lotsearch) or who otherwise has access to the Report (Terms). The contract terms that apply between Lotsearch and the purchaser of the Report are specified in the order form pursuant to which the Report was ordered and the terms set out below are of no effect as between Lotsearch and the purchaser of the Report.

1. End User acknowledges and agrees that:
 - (a) the Report is compiled from or using content (**Third Party Content**) which is comprised of:
 - (i) content provided to Lotsearch by third party content suppliers with whom Lotsearch has contractual arrangements or content which is freely available or methodologies licensed to Lotsearch by third parties with whom Lotsearch has contractual arrangements (**Third Party Content Suppliers**); and
 - (ii) content which is derived from content described in paragraph (i);
 - (b) Neither Lotsearch nor Third Party Content Suppliers takes any responsibility for or give any warranty in relation to the accuracy or completeness of any Third Party Content included in the Report including any contaminated land assessment or other assessment included as part of a Report;
 - (c) the Third Party Content Suppliers do not constitute an exhaustive set of all repositories or sources of information available in relation to the property which is the subject of the Report (**Property**) and accordingly neither Lotsearch nor Third Party Content Suppliers gives any warranty in relation to the accuracy or completeness of the Third Party Content incorporated into the report including any contaminated land assessment or other assessment included as part of a Report;
 - (d) Reports are generated at a point in time (as specified by the date/time stamp appearing on the Report) and accordingly the Report is based on the information available at that point in time and Lotsearch is not obliged to undertake any additional reporting to take into consideration any information that may become available between the point in time specified by the date/time stamp and the date on which the Report was provided by Lotsearch to the purchaser of the Report;
 - (e) Reports must be used or reproduced in their entirety and End User must not reproduce or make available to other persons only parts of the Report;
 - (f) Lotsearch has not undertaken any physical inspection of the property;
 - (g) neither Lotsearch nor Third Party Content Suppliers warrants that all land uses or features whether past or current are identified in the Report;
 - (h) the Report does not include any information relating to the actual state or condition of the Property;
 - (i) the Report should not be used or taken to indicate or exclude actual fitness or unfitness of Land or Property for any particular purpose
 - (j) the Report should not be relied upon for determining saleability or value or making any other decisions in relation to the Property and in particular should not be taken to be a rating or assessment of the desirability or market value of the property or its features; and
 - (k) the End User should undertake its own inspections of the Land or Property to satisfy itself that there are no defects or failures
2. The End User may not make the Report or any copies or extracts of the report or any part of it available to any other person. If End User wishes to provide the Report to any other person or make extracts or copies of the Report, it must contact the purchaser of the Report before doing so to ensure the proposed use is consistent with the contract terms between Lotsearch and the purchaser.
3. Neither Lotsearch (nor any of its officers, employees or agents) nor any of its Third Party Content Suppliers will have any liability to End User or any person to whom End User provides the Report and End User must not represent that Lotsearch or any of its Third Party Content Suppliers accepts liability to any such person or make any other representation to any such person on behalf of Lotsearch or any Third Party Content Supplier.
4. The End User hereby to the maximum extent permitted by law:
 - (a) acknowledges that the Lotsearch (nor any of its officers, employees or agents), nor any of its Third Party Content Supplier have any liability to it under or in connection with the

- Report or these Terms;
- (b) waives any right it may have to claim against Third Party Content Supplier in connection with the Report, or the negotiation of, entry into, performance of, or termination of these Terms; and
 - (c) releases each Third Party Content Supplier from any claim it may have otherwise had in connection with the Report, or the negotiation of, entry into, performance of, or termination of these Terms.
5. The End User acknowledges that any Third Party Supplier shall be entitled to plead the benefits conferred on it under clause 4, despite not being a party to these terms.
 6. End User must not remove any copyright notices, trade marks, digital rights management information, other embedded information, disclaimers or limitations from the Report or authorise any person to do so.
 7. End User acknowledges and agrees that Lotsearch and Third Party Content Suppliers retain ownership of all copyright, patent, design right (registered or unregistered), trade marks (registered or unregistered), database right or other data right, moral right or know how or any other intellectual property right in any Report or any other item, information or data included in or provided as part of a Report.
 8. To the extent permitted by law and subject to paragraph 9, all implied terms, representations and warranties whether statutory or otherwise relating to the subject matter of these Terms other than as expressly set out in these Terms are excluded.
 9. Subject to paragraph 6, Lotsearch excludes liability to End User for loss or damage of any kind, however caused, due to Lotsearch's negligence, breach of contract, breach of any law, in equity, under indemnities or otherwise, arising out of all acts, omissions and events whenever occurring.
 10. Lotsearch acknowledges that if, under applicable State, Territory or Commonwealth law, End User is a consumer certain rights may be conferred on End User which cannot be excluded, restricted or modified. If so, and if that law applies to Lotsearch, then, Lotsearch's liability is limited to the greater of an amount equal to the cost of resupplying the Report and the maximum extent permitted under applicable laws.
 11. Subject to paragraph 9, neither Lotsearch nor the End User is liable to the other for:
 - (a) any indirect, incidental, consequential, special or exemplary damages arising out of or in relation to the Report or these Terms; or
 - (b) any loss of profit, loss of revenue, loss of interest, loss of data, loss of goodwill or loss of business opportunities, business interruption arising directly or indirectly out of or in relation to the Report or these Terms,irrespective of how that liability arises including in contract or tort, liability under indemnity or for any other common law, equitable or statutory cause of action or otherwise.
 12. These Terms are subject to New South Wales law.

Accreditation No. 825
 Accredited for compliance with
 ISO/IEC 17025 - Testing

This report supersedes any previous report(s) with this reference. Results apply to the sample(s) as submitted. This document shall not be reproduced, except in full.

This Certificate of Analysis contains the following information:

- General Comments
- Analytical Results
- Descriptive Results
- Surrogate Control Limits

Additional information pertinent to this report will be found in the following separate attachments: Quality Control Report, QA/QC Compliance Assessment to assist with Quality Review and Sample Receipt Notification.

Signatories

This document has been electronically signed by the authorized signatories below. Electronic signing is carried out in compliance with procedures specified in 21 CFR Part 11.

Signatories	Position	Accreditation Category
Christopher Owler	Team Leader - Asbestos	Newcastle - Asbestos, Mayfield West, NSW
Edwandy Fadjjar	Organic Coordinator	Sydney Organics, Smithfield, NSW
Ivan Taylor	Analyst	Sydney Inorganics, Smithfield, NSW
Raymond Commodore	Instrument Chemist	Sydney Inorganics, Smithfield, NSW
Sanjeshni Jyoti	Senior Chemist Volatiles	Sydney Organics, Smithfield, NSW

General Comments

The analytical procedures used by the Environmental Division have been developed from established internationally recognized procedures such as those published by the USEPA, APHA, AS and NEPM. In house developed procedures are employed in the absence of documented standards or by client request.

Where moisture determination has been performed, results are reported on a dry weight basis.

Where a reported less than (<) result is higher than the LOR, this may be due to primary sample extract/digestate dilution and/or insufficient sample for analysis.

Where the LOR of a reported result differs from standard LOR, this may be due to high moisture content, insufficient sample (reduced weight employed) or matrix interference.

When sampling time information is not provided by the client, sampling dates are shown without a time component. In these instances, the time component has been assumed by the laboratory for processing purposes.

Where a result is required to meet compliance limits the associated uncertainty must be considered. Refer to the ALS Contact for details.

Key : CAS Number = CAS registry number from database maintained by Chemical Abstracts Services. The Chemical Abstracts Service is a division of the American Chemical Society.
LOR = Limit of reporting
^ = This result is computed from individual analyte detections at or above the level of reporting
ø = ALS is not NATA accredited for these tests.
~ = Indicates an estimated value.

- Benzo(a)pyrene Toxicity Equivalent Quotient (TEQ) per the NEPM (2013) is the sum total of the concentration of the eight carcinogenic PAHs multiplied by their Toxicity Equivalence Factor (TEF) relative to Benzo(a)pyrene. TEF values are provided in brackets as follows: Benz(a)anthracene (0.1), Chrysene (0.01), Benzo(b+j) & Benzo(k)fluoranthene (0.1), Benzo(a)pyrene (1.0), Indeno(1.2.3.cd)pyrene (0.1), Dibenzo(a,h)anthracene (1.0), Benzo(g,h,i)perylene (0.01). Less than LOR results for 'TEQ Zero' are treated as zero
- EA200 'Am' Amosite (brown asbestos)
- EA200 'Cr' Crocidolite (blue asbestos)
- EA200 'Trace' - Asbestos fibres ("Free Fibres") detected by trace analysis per AS4964. The result can be interpreted that the sample contains detectable 'respirable' asbestos fibres
- EA200: Asbestos Identification Samples were analysed by Polarised Light Microscopy including dispersion staining.
- EA200 Legend
- EA200 'Ch' Chrysotile (white asbestos)
- EA200: 'UMF' Unknown Mineral Fibres. "-" indicates fibres detected may or may not be asbestos fibres. Confirmation by alternative techniques is recommended.
- EA200: Negative results for vinyl tiles should be confirmed by an independent analytical technique.
- EA200: For samples larger than 30g, the <2mm fraction may be sub-sampled prior to trace analysis as outlined in ISO23909:2008(E) Sect 6.3.2-2
- EA200: 'Yes' - Asbestos detected by polarised light microscopy including dispersion staining.
- EA200: 'No*' - No asbestos found, at the reporting limit of 0.1g/kg, by polarised light microscopy including dispersion staining. Asbestos material was detected and positively identified at concentrations estimated to be below 0.1g/kg.
- EA200: 'No' - No asbestos found at the reporting limit 0.1g/kg, by polarised light microscopy including dispersion staining.

QA/QC Compliance Assessment to assist with Quality Review

Work Order	: ES1909468	Page	: 1 of 9
Client	: ENVIROTECH PTY. LTD.	Laboratory	: Environmental Division Sydney
Contact	: SIMON DOBERER	Telephone	: +61-2-8784 8555
Project	: Mount Vernon Road, Mount Vernon	Date Samples Received	: 27-Mar-2019
Site	: ----	Issue Date	: 04-Apr-2019
Sampler	: Jack Hinchliffe	No. of samples received	: 27
Order number	: 757919	No. of samples analysed	: 27

This report is automatically generated by the ALS LIMS through interpretation of the ALS Quality Control Report and several Quality Assurance parameters measured by ALS. This automated reporting highlights any non-conformances, facilitates faster and more accurate data validation and is designed to assist internal expert and external Auditor review. Many components of this report contribute to the overall DQO assessment and reporting for guideline compliance.

Brief method summaries and references are also provided to assist in traceability.

Summary of Outliers

Outliers : Quality Control Samples

This report highlights outliers flagged in the Quality Control (QC) Report.

- **NO** Method Blank value outliers occur.
- **NO** Duplicate outliers occur.
- **NO** Laboratory Control outliers occur.
- **NO** Matrix Spike outliers occur.
- For all regular sample matrices, **NO** surrogate recovery outliers occur.

Outliers : Analysis Holding Time Compliance

- **NO** Analysis Holding Time Outliers exist.

Outliers : Frequency of Quality Control Samples

- **NO** Quality Control Sample Frequency Outliers exist.

Analysis Holding Time Compliance

If samples are identified below as having been analysed or extracted outside of recommended holding times, this should be taken into consideration when interpreting results.

This report summarizes extraction / preparation and analysis times and compares each with ALS recommended holding times (referencing USEPA SW 846, APHA, AS and NEPM) based on the sample container provided. Dates reported represent first date of extraction or analysis and preclude subsequent dilutions and reruns. A listing of breaches (if any) is provided herein.

Holding time for leachate methods (e.g. TCLP) vary according to the analytes reported. Assessment compares the leach date with the shortest analyte holding time for the equivalent soil method. These are: organics 14 days, mercury 28 days & other metals 180 days. A recorded breach does not guarantee a breach for all non-volatile parameters.

Holding times for VOC in soils vary according to analytes of interest. Vinyl Chloride and Styrene holding time is 7 days; others 14 days. A recorded breach does not guarantee a breach for all VOC analytes and should be verified in case the reported breach is a false positive or Vinyl Chloride and Styrene are not key analytes of interest/concern.

Matrix: **SOIL**

Evaluation: ✖ = Holding time breach ; ✔ = Within holding time.

Quality Control Parameter Frequency Compliance

The following report summarises the frequency of laboratory QC samples analysed within the analytical lot(s) in which the submitted sample(s) was(were) processed. Actual rate should be greater than or equal to the expected rate. A listing of breaches is provided in the Summary of Outliers.

Matrix: **SOIL**

Evaluation: ✖ = Quality Control frequency not within specification ; ✔ = Quality Control frequency within specification.

Quality Control Sample Type		Count		Rate (%)			Quality Control Specification
Analytical Methods	Method	QC	Regular	Actual	Expected	Evaluation	
Laboratory Duplicates (DUP)

Brief Method Summaries

The analytical procedures used by the Environmental Division have been developed from established internationally recognized procedures such as those published by the US EPA, APHA, AS and NEPM. In house developed procedures are employed in the absence of documented standards or by client request. The following report provides brief descriptions of the analytical procedures employed for results reported in the Certificate of Analysis. Sources from which ALS methods have been developed are provided within the Method Descriptions.

Analytical Methods	Method	Matrix	Method Descriptions
Moisture Content	EA055	SOIL	In house: A gravimetric procedure based on weight loss over a 12 hour drying period at 105-110 degrees C. This method is compliant with NEPM (2013) Schedule B(3) Section 7.1 and Table 1 (14 day holding time).
Asbestos Identification in Soils	EA200	SOIL	AS 4964 - 2004 Method for the qualitative identification of asbestos in bulk samples Analysis by Polarised Light Microscopy including dispersion staining
Total Metals by ICP-AES	EG005T	SOIL	In house: Referenced to APHA 3120; USEPA SW 846 - 6010. Metals are determined following an appropriate acid digestion of the soil. The ICPAES technique ionises samples in a plasma, emitting a characteristic spectrum based on metals present. Intensities at selected wavelengths are compared against those of matrix matched standards. This method is compliant with NEPM (2013) Schedule B(3)
Total Mercury by FIMS	EG035T	SOIL	In house: Referenced to AS 3550, APHA 3112 Hg - B (Flow-injection (SnCl ₂) (Cold Vapour generation) AAS) FIM-AAS is an automated flameless atomic absorption technique. Mercury in solids are determined following an appropriate acid digestion. Ionic mercury is reduced online to atomic mercury vapour by SnCl ₂ which is then purged into a heated quartz cell. Quantification is by comparing absorbance against a calibration curve. This method is compliant with NEPM (2013) Schedule B(3)
Polychlorinated Biphenyls (PCB)	EP066	SOIL	In house: Referenced to USEPA SW 846 - 8270D Extracts are analysed by Capillary GC/MS and quantification is by comparison against an established 5 point calibration curve. This method is compliant with NEPM (2013) Schedule B(3) (Method 504)
Pesticides by GCMS	EP068	SOIL	In house: Referenced to USEPA SW 846 - 8270D Extracts are analysed by Capillary GC/MS and quantification is by comparison against an established 5 point calibration curve. This technique is compliant with NEPM (2013) Schedule B(3) (Method 504,505)
TRH - Semivolatile Fraction	EP071	SOIL	In house: Referenced to USEPA SW 846 - 8015A Sample extracts are analysed by Capillary GC/FID and quantified against alkane standards over the range C10 - C40. Compliant with NEPM amended 2013.
PAH/Phenols (SIM)	EP075(SIM)	SOIL	In house: Referenced to USEPA SW 846 - 8270D. Extracts are analysed by Capillary GC/MS in Selective Ion Mode (SIM) and quantification is by comparison against an established 5 point calibration curve. This method is compliant with NEPM (2013) Schedule B(3) (Method 502 and 507)
TRH Volatiles/BTEX	EP080	SOIL	In house: Referenced to USEPA SW 846 - 8260B. Extracts are analysed by Purge and Trap, Capillary GC/MS. Quantification is by comparison against an established 5 point calibration curve. Compliant with NEPM amended 2013.
Preparation Methods	Method	Matrix	Method Descriptions
Hot Block Digest for metals in soils sediments and sludges	EN69	SOIL	In house: Referenced to USEPA 200.2. Hot Block Acid Digestion 1.0g of sample is heated with Nitric and Hydrochloric acids, then cooled. Peroxide is added and samples heated and cooled again before being filtered and bulked to volume for analysis. Digest is appropriate for determination of selected metals in sludge, sediments, and soils. This method is compliant with NEPM (2013) Schedule B(3) (Method 202)
Methanolic Extraction of Soils for Purge and Trap	ORG16	SOIL	In house: Referenced to USEPA SW 846 - 5030A. 5g of solid is shaken with surrogate and 10mL methanol prior to analysis by Purge and Trap - GC/MS.

Page : 9 of 9
Work Order : ES1909468
Client : ENVIROTECH PTY. LTD.
Project : Mount Vernon Road, Mount Vernon

Preparation Methods	Method	Matrix	Method Descriptions
Tumbler Extraction of Solids	ORG17	SOIL	In house: Mechanical agitation (tumbler). 10g of sample, Na2SO4 and surrogate are extracted with 30mL 1:1 DCM/Acetone by end over end tumble. The solvent is decanted, dehydrated and concentrated (by KD) to the desired volume for analysis.

Accreditation No. 825
 Accredited for compliance with
 ISO/IEC 17025 - Testing

This report supersedes any previous report(s) with this reference. Results apply to the sample(s) as submitted. This document shall not be reproduced, except in full.

This Quality Control Report contains the following information:

- Laboratory Duplicate (DUP) Report; Relative Percentage Difference (RPD) and Acceptance Limits
- Method Blank (MB) and Laboratory Control Spike (LCS) Report; Recovery and Acceptance Limits
- Matrix Spike (MS) Report; Recovery and Acceptance Limits

Signatories

This document has been electronically signed by the authorized signatories below. Electronic signing is carried out in compliance with procedures specified in 21 CFR Part 11.

Signatories	Position	Accreditation Category
Christopher Owler	Team Leader - Asbestos	Newcastle - Asbestos, Mayfield West, NSW
Edwandy Fadjar	Organic Coordinator	Sydney Organics, Smithfield, NSW
Ivan Taylor	Analyst	Sydney Inorganics, Smithfield, NSW
Raymond Commodore	Instrument Chemist	Sydney Inorganics, Smithfield, NSW
Sanjeshni Jyoti	Senior Chemist Volatiles	Sydney Organics, Smithfield, NSW

General Comments

The analytical procedures used by the Environmental Division have been developed from established internationally recognized procedures such as those published by the USEPA, APHA, AS and NEPM. In house developed procedures are employed in the absence of documented standards or by client request.

Where moisture determination has been performed, results are reported on a dry weight basis.

Where a reported less than (<) result is higher than the LOR, this may be due to primary sample extract/digestate dilution and/or insufficient sample for analysis. Where the LOR of a reported result differs from standard LOR, this may be due to high

Key :
 Anonymous = Refers to samples which are not specifically part of this work order but formed part of the QC process lot
 CAS Number = CAS registry number from database maintained by Chemical Abstracts Services. The Chemical Abstracts Service is a division of the American Chemical Society.
 LOR = Limit of reporting
 RPD = Relative Percentage Difference
 # = Indicates failed QC

Laboratory Duplicate (DUP) Report

The quality control term Laboratory Duplicate refers to a randomly selected intralaboratory split. Laboratory duplicates provide information regarding method precision and sample heterogeneity. The permitted ranges for the Relative Percent Deviation (RPD) of Laboratory Duplicates are specified in ALS Method QWI-EN/38 and are dependent on the magnitude of results in comparison to the level of reporting: Result < 10 times LOR: No Limit; Result between 10 and 20 times LOR: 0% - 50%; Result > 20 times LOR: 0% - 20%.

Method Blank (MB) and Laboratory Control Spike (LCS) Report

The quality control term Method / Laboratory Blank refers to an analyte free matrix to which all reagents are added in the same volumes or proportions as used in standard sample preparation. The purpose of this QC parameter is to monitor potential laboratory contamination. The quality control term Laboratory Control Spike (LCS) refers to a certified reference material, or a known interference free matrix spiked with target analytes. The purpose of this QC parameter is to monitor method precision and accuracy independent of sample matrix. Dynamic Recovery Limits are based on statistical evaluation of processed LCS.

Matrix Spike (MS) Report

The quality control term Matrix Spike (MS) refers to an intralaboratory split sample spiked with a representative set of target analytes. The purpose of this QC parameter is to monitor potential matrix effects on analyte recoveries. Static Recovery Limits as per laboratory Data Quality Objectives (DQOs). Ideal recovery ranges stated may be waived in the event of sample matrix interference.
